

Privacy Policy

Effective date: [TBD before publish] **Last updated:** [TBD] **Version:** 1.0 — DRAFT pending Bangladesh-qualified legal review.

⚠ **DRAFT — pending lawyer review.** Not for production use until a Bangladesh-qualified lawyer has reviewed and confirmed this document satisfies the Bangladesh Personal Data Protection (PDP) framework and the disclosure standards expected for an institutional research-and-infrastructure organization.

1. Scope

This Privacy Policy describes how Daemion processes personal data submitted through:

- The public website at `daemion.com` .
- Inquiry forms and mailboxes listed on `/contact` .
- Careers applications submitted to `careers@daemion.com` or through posted role surfaces.
- Direct correspondence with any Daemion office.

Personal data processed by Daemion's deployed products (Eidolon, Kheiron, Merqis, Aevum) is governed by separate engagement-specific data processing agreements, executed at the point of direct engagement. Those agreements supersede this Policy for the data they describe.

2. Controller

Daemion is operated by [LEGAL ENTITY NAME — e.g. Daemion Technologies Ltd], incorporated in Bangladesh. Registered office: [REGISTERED ADDRESS]. Trade license: [TRADE LICENSE NUMBER].

For questions about this Policy or any personal data Daemion processes, contact `privacy@daemion.com` .

3. What data Daemion collects

Daemion collects only the data needed to respond to inquiries, evaluate careers applications, and operate the public website.

CATEGORY	SOURCE	PURPOSE
Name, organization, role	Inquiry form, direct email	Route the inquiry to the correct office and respond
Email address	Inquiry form, direct email, careers application	Reply to the inquiry; correspond on the application
Inquiry content	Inquiry form, direct email	Read and respond
Careers application materials (CV, portfolio, supporting documents)	Careers submission	Evaluate fit for open or standing-interest roles
Interview notes and assessment results	Hiring process	Evaluate the candidate; retain only with the candidate's consent
IP address, user agent, request timing	Web server logs	Operate the website; detect abuse
Page-view paths (aggregated, no cookies)	Server-side log analysis	Understand which pages are read; inform editorial decisions

Daemion **does not** deploy third-party analytics, advertising trackers, social-media pixels, or session-replay tools on the public website. Page-view analysis is server-side and aggregated.

Daemion **does not** set cookies for analytics, marketing, or personalization on the public website. Strictly-necessary cookies for the inquiry form's anti-spam mechanism are set only when the form is loaded; they are session-only.

4. Why Daemion processes the data

Daemion processes the data described in §3 for the following purposes:

1. Respond to inquiries received through the website or direct email.
2. Evaluate and respond to careers applications.
3. Operate and secure the public website.
4. Comply with legal obligations (tax records, regulatory disclosures, lawful requests).
5. Maintain institutional records of correspondence with sovereign, enterprise, research, and capital partners, where retention is appropriate to the relationship.

Daemion does not use website-visitor data, inquiry data, or careers data for marketing, profiling, advertising, or training of any Daemion product.

5. Legal basis

The legal basis for processing under the Bangladesh PDP framework and equivalent international standards is:

- **Inquiry data:** legitimate interest of the inquirer in receiving a response, and Daemion's legitimate interest in operating an institutional correspondence channel.
- **Careers data:** the candidate's consent and the legitimate interest of evaluating fit for the role.
- **Website log data:** legitimate interest in operating and securing the site.
- **Records of institutional correspondence:** legitimate interest in maintaining institutional records.

6. Subprocessors

Daemion uses a minimal set of subprocessors to operate the public website and correspondence infrastructure:

SUBPROCESSOR	FUNCTION	LOCATION
[HOSTING PROVIDER TBD]	Website hosting and edge delivery	[Region TBD]
[EMAIL PROVIDER TBD]	Inbound and outbound email for the listed mailboxes	[Region TBD]
[BACKUP PROVIDER TBD]	Encrypted off-site backup of correspondence records	[Region TBD]

Subprocessors are bound by contractual confidentiality and data-processing terms.

This list is updated whenever a subprocessor is added, removed, or changes function. The current list is authoritative.

7. Retention

DATA	RETENTION
Inquiry form submissions	24 months from receipt, then archived in aggregate or deleted
Direct email correspondence	Until the institutional matter is concluded, plus 24 months; longer where regulatory record-keeping applies
Careers application materials	12 months from the close of the role; longer with candidate's written consent for future consideration
Interview notes and assessments	12 months from the close of the role
Web server logs	90 days, then aggregated or deleted
Tax and financial records	As required by Bangladesh tax law (currently 7 years)

8. Transfers outside Bangladesh

Subprocessors listed in §6 may process personal data outside Bangladesh. Each subprocessor is selected for industry-standard contractual and technical safeguards. Where a subprocessor processes data outside Bangladesh, transfers are conducted under the contractual terms binding that subprocessor.

9. Security

Daemion maintains administrative, technical, and physical safeguards appropriate to the sensitivity of the data processed:

- Correspondence systems require multi-factor authentication.
- Inquiry-form submissions are encrypted in transit (TLS 1.2 or higher) and at rest.
- Careers application materials are accessible only to the hiring panel for the relevant role.
- Server logs are accessible only to a restricted infrastructure team.
- Backups are encrypted and access-controlled.
- The Company office reviews access logs on a periodic basis.

No system is perfectly secure. If a security incident is reasonably likely to affect a person whose data Daemion processes, Daemion notifies the affected parties within 72 hours of becoming aware of the incident.

Vulnerability reports are accepted at security@daemion.com. A PGP key is published at [URL TBD].

10. Individual rights

If Daemion processes your personal data, you have the right to:

1. **Access** — receive a copy of the data Daemion holds about you.
2. **Correct** — request correction of inaccurate data.
3. **Delete** — request deletion, subject to legal retention obligations described in §7.
4. **Restrict** — request restriction of processing.
5. **Object** — object to processing on legitimate-interest grounds.
6. **Withdraw consent** — where processing relies on consent (e.g., extended careers retention).
7. **Lodge a complaint** — with the Bangladesh data protection authority once the PDP regulator is operational.

To exercise any right, contact privacy@daemion.com. Daemion acknowledges every request within 3 business days and responds substantively within 30 days. Where a request requires longer review, Daemion communicates the timeline in writing.

For data-deletion requests specifically, see [Data Deletion](#).

11. Minors

Daemion's public surface is not directed at minors. Daemion does not knowingly collect personal data from anyone under 13. If material submitted to Daemion indicates that the submitter is a minor, the submission is deleted and the submitter is informed where contact is feasible.

12. Changes to this Policy

Daemion updates this Policy when subprocessors change, retention windows change, the legal entity changes, or the scope of processed data changes. Material changes are recorded in the version history at the foot of this document. The effective date at the top of the page reflects the date of the most recent material change.

13. Contact

For privacy inquiries:

- **Email:** privacy@daemion.com
- **Postal:** [REGISTERED OFFICE ADDRESS], Dhaka, Bangladesh

For general inquiries: see [Contact](#).

Document control: revision **1.0 (DRAFT)**. Owner: Company Office. Review cadence: every 12 months, or whenever a material change occurs in subprocessors, retention windows, legal entity, or the scope of processed data.
