Route: / (apps/web/src/app/page.tsx) **Master line:** Daemion builds cognition systems for the next industrial civilization. **Tagline:** Intelligence Beyond Instruction. **Primary CTA:** Contact — institutional inquiries.

Section 1 — Hero

Wordmark: DAEMON

Tagline (locked): Intelligence Beyond Instruction.

Master line (large display type): Daemion builds cognition systems for the next industrial civilization.

Sub-paragraph (one paragraph, restrained): Daemion is a frontier intelligence company. We design autonomous cognition systems operating across business, infrastructure, governance, and machine coordination. Not chatbots. Not apps. Cognition infrastructure.

Single CTA link, low-key, lower-right: Contact → → /contact

Visual direction: full-bleed graphite background. Wordmark in warm off-white, ultra-thin. Tagline below in small caps. No imagery. No motion on initial load.

Section 2 — Master positioning

Heading: What Daemion is.

Body (three short paragraphs, no bullets):

Daemion sits at the intersection of three reference identities: the philosophical depth of an alignment laboratory, the infrastructural seriousness of a planetary-scale platform, and the product elegance of a deeply considered consumer surface.

We build the cognition layer for institutions that operate on the order of decades — sovereign systems, frontier enterprises, strategic operators, and the research community that informs them.

We do not sell convenience. We construct the substrate.

Section 3 — The architecture

Heading: Daemion operates 6 divisions, 4 products, and 4 internal research labs.

Body (single line): Each addresses a distinct layer of the intelligence stack.

Three-column architecture summary (anchor links into the respective pages):

DIVISIONS	PRODUCTS	LABS
Core — foundation cognition	Eidolon — persistent cognitive counterpart	Orpheus — machine consciousness
Vector — autonomous execution	Kheiron — strategic intelligence	Mnemosyne — long-memory systems
Atlas — planetary intelligence	Merqis — enterprise OS	Atar — autonomous defense
Forge — AI hardware & compute	Aevum — civilizational modeling	Thaleon — planetary infrastructure
Helix — biotech & synthetic cognition		
Veil — classified systems		

Below the table, single muted link: [See the full architecture → → /divisions](#)

Section 4 — Research statement (compressed)

Heading: Research.

Body (one paragraph): Daemion's research agenda concerns reasoning architectures, long-horizon planning under uncertainty, alignment of autonomous systems, persistent memory, and the operational coordination of machine agents at scale. Internal labs operate under deliberate secrecy. Publications appear when warranted.

Single muted link: [Research statement → → /research](#)

Section 5 — Phases

Heading: The arc.

Body (one short paragraph): Daemion is built for the long arc of the next industrial civilization. Five phases describe the trajectory.

Five-phase list (vertical, ultra-minimal — Roman numerals, single line each):

- I — Foundation models and enterprise cognition.
- II — Autonomous operations layer for global business.
- III — Infrastructure-scale intelligence systems.
- IV — AI-governed logistics, economics, and robotics.
- V — Civilizational coordination infrastructure.

Closing line (italic, muted): At the final stage, Daemion becomes less a company, more a cognitive substrate for institutions.

Section 6 — Cultural stance

Heading: What Daemion is not.

Body (one paragraph): Daemion is not a friendly assistant, an everyday productivity tool, or a consumer entertainment surface. It is critical intelligence infrastructure for advanced civilization. The tone is restrained, the surfaces are silent, and the interfaces imply intelligence rather than advertise it.

No CTA in this section. Intentional negative space.

Section 7 — Contact (institutional only)

Heading: Engage with Daemion.

Body (two short paragraphs): Inquiries from sovereign institutions, enterprise operators, frontier research collaborators, and capital partners are handled directly through the Company office.

Daemion does not run a sales funnel.

Single CTA: Contact the office → → /contact

Footer

Per `SITEMAP.md` — 3-column footer (Daemion / Research / Legal) plus brand row. Footer not duplicated here.

Brand row (locked text):

DAEMION · Intelligence Beyond Instruction · © 2026 · Dhaka

Copy review checklist

- ☐ Master line, tagline, and "Not chatbots. Not apps. Cognition infrastructure." appear verbatim — no paraphrase
- ☐ No forbidden words (full list in `brand/voice.md`) — automated lint before publish
- ☐ No exclamation marks, no questions in headlines, no first-person "you"
- ☐ Architecture table verified against `Brand_Naming_Report.pdf` (6 divisions, 4 products, 4 labs)
- ☐ Visual direction respected (graphite background, ultra-thin display type, no imagery)
- ☐ `Organization` schema implemented in page head
- ☐ OG image is the monochrome wordmark variant
- ☐ Dhaka address confirmed before brand-row publish
